Yubin Seo

School of Electrical and Electronics Engineering, Chung-Ang University

Education

Chung-Ang University
Seoul, Korea

- School of Electrical and Electronics Engineering (B.S.)
- Mar 2022 — Feb 2027 (Expected)

Research & Mentoring Experience

Chung-Ang University
| Undergraduate Intern
Mar 2026 – Present

- Studied GPU utilization optimization for Large Language Model (LLM) serving under the supervision of Prof. Cheolho Hong.

Seoul National University
| Undergraduate Intern
Sep 2025 – Dec 2025

- Designed and implemented a low-power FPGA-based Spiking Neural Network (SNN) Wake-Word Spotting System under the supervision of Prof. Wookyung Sun.

ESP32 (Arduino) Mentoring
| Mentor
Sep 2024 – Dec 2024

- Taught ESP32-based hardware control and firmware development for club members.

Selected Projects

MINI-V Android
: Custom LineageOS
May 2026 – Present

- Exploring system-level integration of a compact model, leveraging the Hexagon NPU through a vendor-side inference service shared across applications.

Autonomous Driving
Scale Car
Telechips Internship
Jan 2026

- Telechips Internship
- Real-time object detection and lane following using YOLOv8 and OpenCV.
- Optimized AI model inference on Topst NPU(AI-G) board.

FPGA based SNN
Wake-Word Spotting System
(Individual Project)
Sep 2025 – Dec 2025

- Supervised by Prof. Wookyung Sun
- Designed and implemented a low-power wake-up call detection system using SNN architecture on FPGA.
- Awarded 3rd Place at the SIF 2026 competition.

Aquamonitor
: Beverage Intake Tracker
May 2024 – Oct 2024

- **Role |** PM & Hardware Developer
- Weight-based beverage intake recording service.
- Reduced module weight through custom PCB manufacturing.

CECOM4CUT
: Thermal Printer Photo Booth
Sep 2023 – Mar 2024

- **Role |** PM & Hardware Developer
- Developed an embedded system that processes JPEGs into 1-bit BMPs via dithering for Bluetooth Thermal Printer.

Yubin Seo

School of Electrical and Electronics Engineering, Chung-Ang University

Award & Certifications

Blue Lighthouse Samsung Donation Scholarship
May 2026

- Selected as an AI Core Talent for the Blue Lighthouse Samsung Donation Scholarship by the Korea Student Aid Foundation (Spring & Fall 2026)

3rd Place, Encouragement Award
Jan 2026

- Semiconductor Innovation Festival (SIF 2026) Category of Work 3rd Place,
  Awarded a scholarship of KRW 1,800,000
- FPGA based SNN Wake-Word Spotting System

2nd Place, Excellence Award
Oct 2024

- IoT Capstone Design Idea Competition, hosted by the Engineering Education Innovation Center of CAU
- Aquamonitor : Beverage Intake Tracker

2nd Place, Excellence Award
Oct 2023

- IoT Capstone Design Idea Competition, hosted by the Engineering Education Innovation Center of CAU
- 나비잠: SIDS Prevention System

Linux Master Level 2
Jan 2025

- KAIT (Korea Association for ICT Promotion)

Extracurricular Activities

GDGoC CAU
Aug 2025 – Present

- Google Developer Group on Campus Chung-Ang Univ. Member

CECOM
Aug 2023 – Present

- Chung-Ang University Computer Hardware Club
- Vice President | Jan 2024 – Dec 2024

Work Experience

Telechips | Intern
Jan 2026

- Developed an autonomous Scale Car utilizing YOLOv8 and OpenCV models on Topst board(AI-G, D3-G, VCP-G).

Seeroo Information
| Marketing Team Contractor
Mar 2025 – Sep 2025

- Planned, developed, and maintained Python-based app/web crawling tools to restructure data and automate data entry systems.

Mirae Academy
| Teaching Assistant
Jul 2022 – Present

- Taught math to high shcool students.
- Covered high school level Calculus, Probability & Statistics, Geometry.

Skills

Programming	C, C++, Python, Verilog.
Tools/Frameworks	PyTorch, Next.js, Autodesk Fusion(3D Model Tool), FreeRTOS
Hardware	Raspberry Pi, ESP32, STM32, NPU Board (AI-G of Topst), FPGA (Nexys-A7).
