Education

Chung-Ang University

Seoul, Korea

- School of Electrical and Electronics Engineering (B.S.)
- Mar 2022 – Feb 2027 (Expected)

Research & Work Experience

Telechips | Intern

Jan 2026

- Developed an autonomous Scale Car utilizing YOLOv8 and OpenCV models on Topst board(AI-G, D3-G, VCP-G).

Seoul National University

| Undergraduate Intern

Sep 2025 – Dec 2025

- Prof. Wooyung Sun
- Designed and implemented FPGA based SNN Wake-Word Spotting System.

Selected Projects

Autonomous Driving

Scale Car

Telechips Internship

Jan 2025

- Telechips Internship
- Implemented real-time object detection and lane following algorithms using YOLOv8 and OpenCV.
- Optimized AI model inference on Topst NPU board.

FPGA based SNN

Wake-Word Spotting System

(Individual Project)

Sep 2025 – Dec 2025

- Supervised by Prof. Wooyung Sun
- Designed and implemented a low-power wake-up call detection system using SNN architecture on FPGA.
- Awarded 3rd Place at the SIF 2026 competition.

Aquamonitor

: Beverage Intake Tracker

May 2024 – Oct 2024

- **Role |** PM & Hardware Developer
- Weight-based beverage intake recording service.

CECOM4CUT

: Thermal Printer Photo Booth

Sep 2023 – Mar 2024

- **Role |** PM & Hardware Developer
- Developed an embedded system that processes JPEGs into 1-bit BMPs via dithering for Bluetooth Thermal Printer.

나비잠

: SIDS Prevention System

May 2023 – Oct 2023

- **Role |** PM & Hardware Developer, App Development Support
- Implemented indoor child tracking using UWB beacons and analyzed bio-signals to prevent Sudden Infant Death Syndrome.

Award & Certificate

3rd Place,

Encouragement Award

Jan 2026

- Semiconductor Innovation Festival (SIF 2026)
- FPGA based SNN Wake-Word Spotting System

Yubin Seo

+82 10-2848-9299

Award & Certificate

2nd Place,

Excellence Award

Oct 2024

- IoT Capstone Design Idea Competition, hosted by the Engineering Education Innovation Center of CAU
- Aquamonitor : Beverage Intake Tracker

2nd Place,

Excellence Award

Oct 2023

- IoT Capstone Design Idea Competition, hosted by the Engineering Education Innovation Center of CAU
- 나비잠: SIDS Prevention System

Linux Master Level 2

Jan 2025

- KAIT (Korea Association for ICT Promotion)

Extracurricular Activities

GDGoC CAU

Aug 2025 – Present

- Google Developer Group on Campus Chung-Ang Univ. Member

CECOM

Aug 2023 – Present

- Chung-Ang University Computer Hardware Club
- Vice President | Jan 2024 – Dec 2024

Teaching

Mirae Academy

| Teaching Assistant

Jul 2022 – Present

- Taught math to high school students.
- Covered high school level Calculus, Probability & Statistics, Geometry.

ESP32 (Arduino) Mentoring

| Mentor

Sep 2024 – Dec 2024

- Taught ESP32-based hardware control and firmware development for club members.

Skills

Programming

C, C++, Python, Verilog.

Operating Systems

FreeRTOS, Embedded Linux (Yocto Project), Ubuntu.

Tools/Frameworks

PyTorch, Next.js, Autodesk Fusion, Autodesk Inventor, Vivado.

Hardware

Raspberry Pi, ESP32, STM32, NPU Board (AI-G of Topst),
FPGA (Nexys-A7).
